

Elec 2 Mobile Application Development 2

Final Project

Rivera, Keziah Millicent C.

3-D

Application Name:

Trabahula: Guess, Learn, and Find Your Future!

Rationale:

Trabahula is an entertaining and educational game in which users guess various occupations and discover fascinating details about them. It helps users or students, particularly those who are still undecided about their future career goals, discover various job alternatives.

Features:

- **Fun Guessing Game About Jobs** - Players guess jobs based on clues or pictures. Helps students learn about different careers in a fun way.
- **Trivia and Facts About Each Job** - After guessing, players get interesting facts about the job. Learn more about the job through fun trivia.
- **Save Scores and Progress Using Hive** - Tracks scores and progress using Hive. Works offline and saves progress so players can come back anytime.

Target Users:

- Students
- Young people who are exploring career options.
- Teachers who want a fun way to introduce jobs to students.

Importance and Novelty of Application:

Trabahula is a creative and engaging way of introducing students to a range of career alternatives, making the process of investigating possible career paths fun and engaging. Young individuals, particularly those who are uncertain about their future, can learn about new careers entertainingly by combining career trivia with a guessing game. Users can follow their learning offline and at any time using Hive to store progress. This unique approach encourages students to consider their future jobs while having a good time, offering an enjoyable and educational setting for exploring various career options.
